Green University of Bangladesh
Department of Computer Science and Engineering (CSE)

Faculty of Sciences and Engineering

Semester: (Fall, Year:2023), B.Sc. in CSE (Day)

Lab Report NO # 06

Course Title: Engineering Drawing

Course Code: CSE-208 Section: 221-D2

Lab Experiment Name: Implementation of 2D floor planning

Student Details

Name		ID
1.	Md.Fahad Nakib	221902149

Lab Date : 20-11-23

Submission Date : 12-01-24

Course Teacher's Name : Md Naimul Pathan

Lab Report Status

Marks: …… **Signature:.....**

Comments:..... **Date:.....**

1. TITLE OF THE LAB EXPERIMENT

Implementation of 2D floor planning

2. OBJECTIVES

i. It will help us to gain knowledge about 2D or 3D drawing platform Auto cad and how to use this software.

ii. We can learn about 2D drawing technique and uses of line, rectangle, circle, etc.

iii. In this experiment we will implement a provided figure using 2D drawing technique.

3. TOOLS AND TECHNOLOGIES

1. line:

Line command draws a straight line from one point to another.

Shortcut Key: L

2. Circle:

Circle helps us to draw a circle. We can draw circle in many ways like using radius, diameter, tan-tan radius, etc.

Shortcut Key: C

3. Trim:

It is used for cutting unwanted line and edges.

Shortcut Key: Tr

4. Angle:

Angle helps us to draw line using different angle. To implement this first we have to select line then press 'Shift+@' and give line diameter then press '<' give angle (45) and then press 'Enter'.

5. Offset:

Offset helps us to create same line in a particular distance.

6. Home design blocks:

Using this tool we can get some objects like sofa, table, bed, lamp, oven, bath tab, etc.

4. IMPLEMENTATION

Step: 01

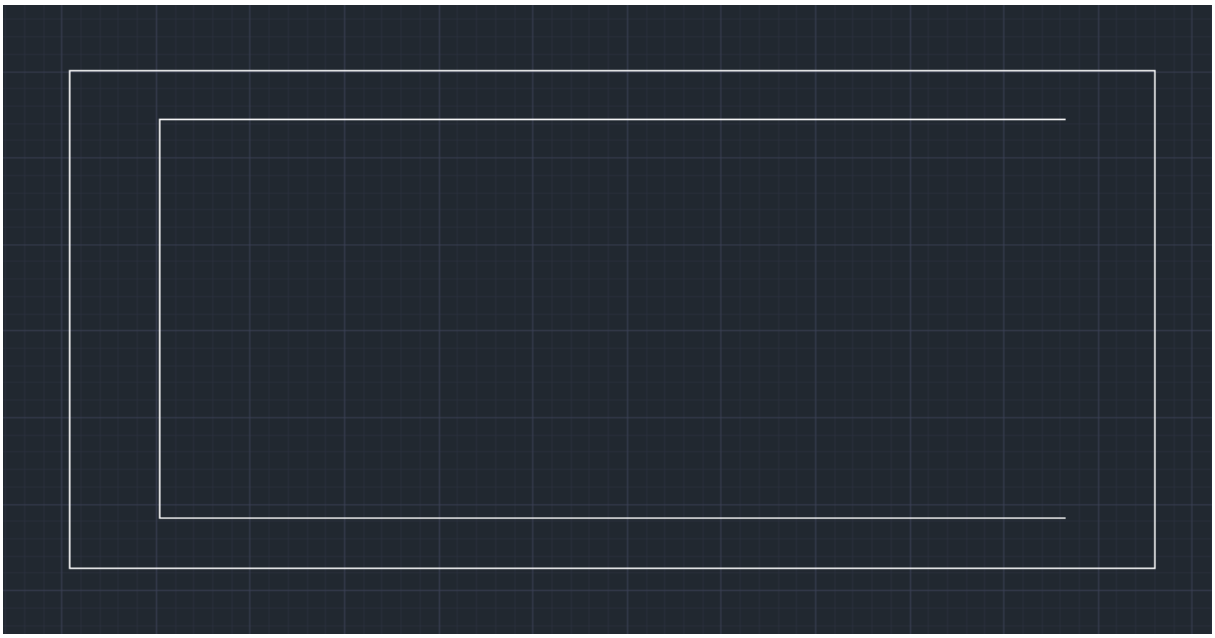

Figure: 01

Step: 02

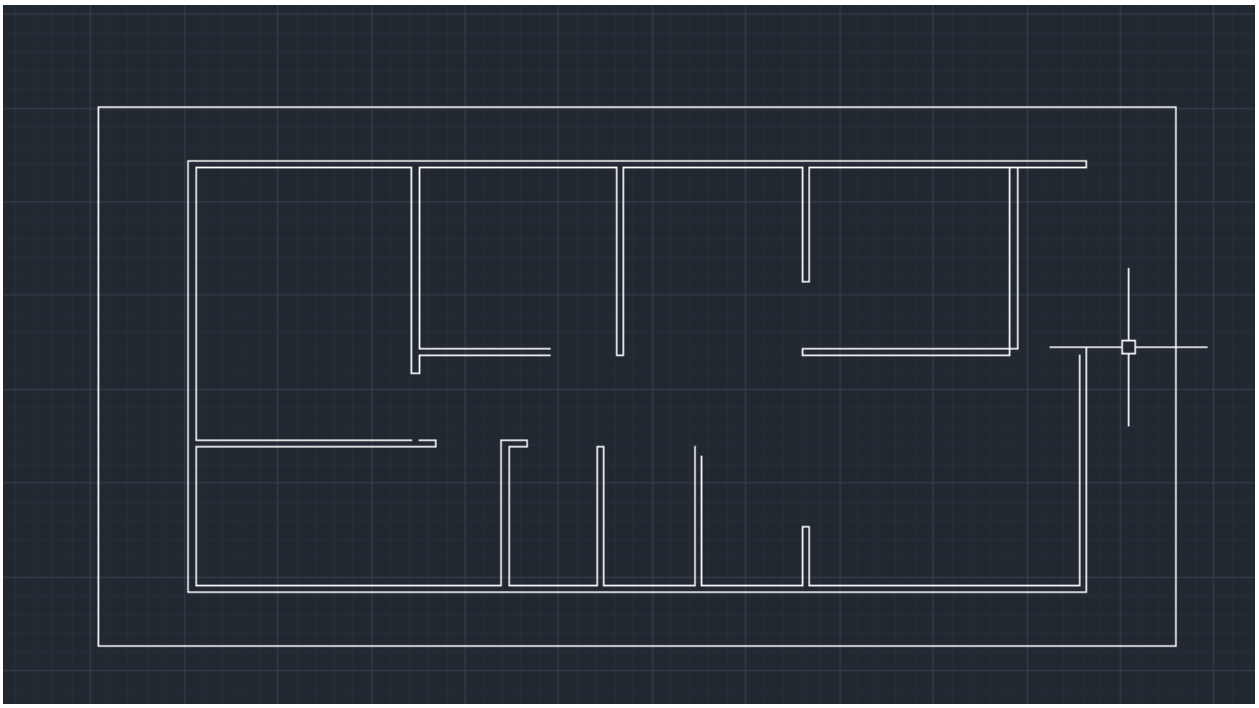

Figure: 02

Step: 03

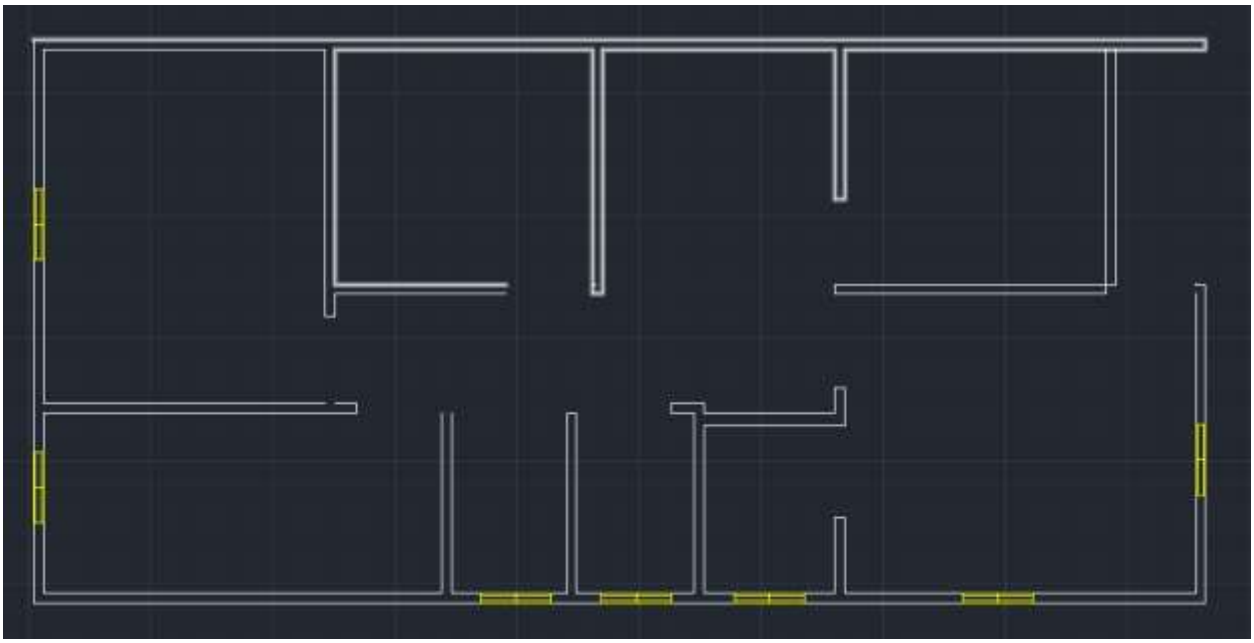

Figure: 03

Step: 04

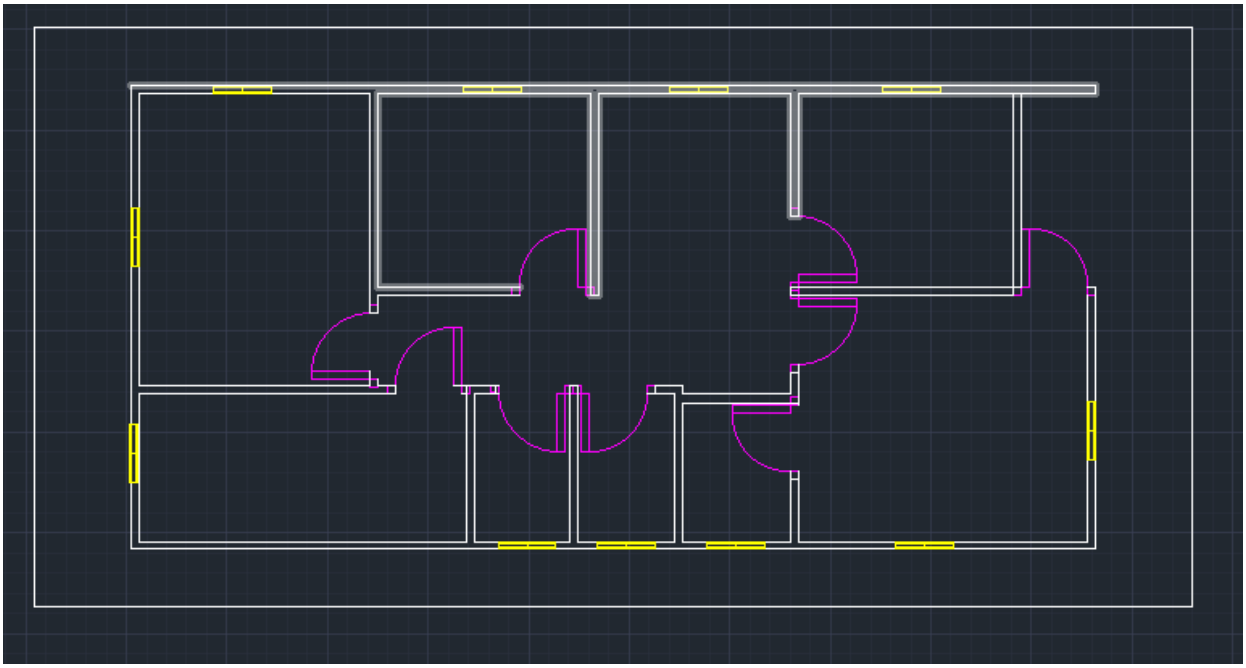

Figure: 04

Step: 05

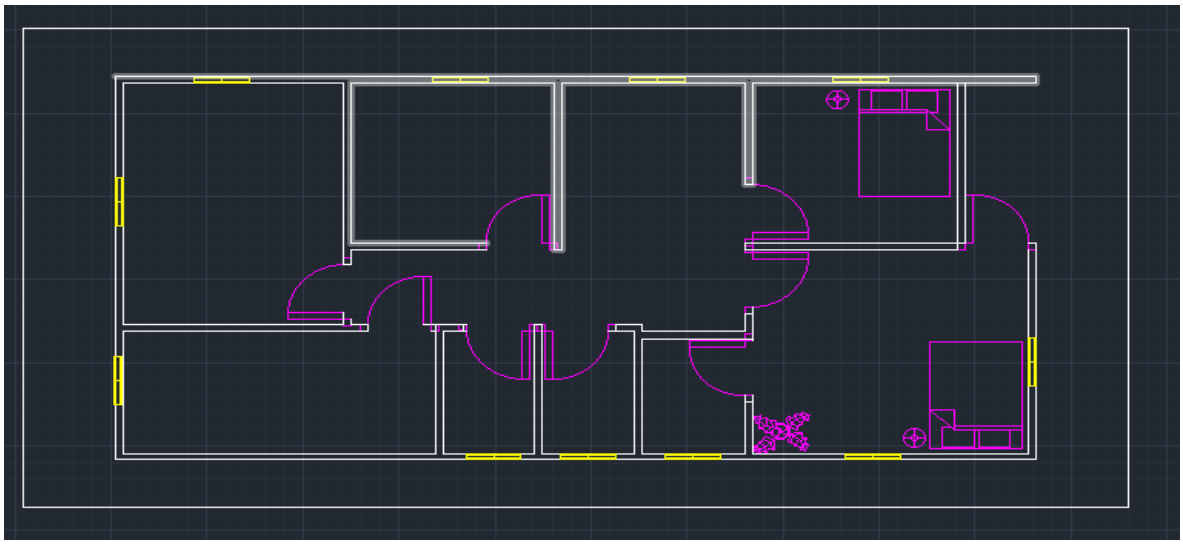

Figure: 05

Step: 06

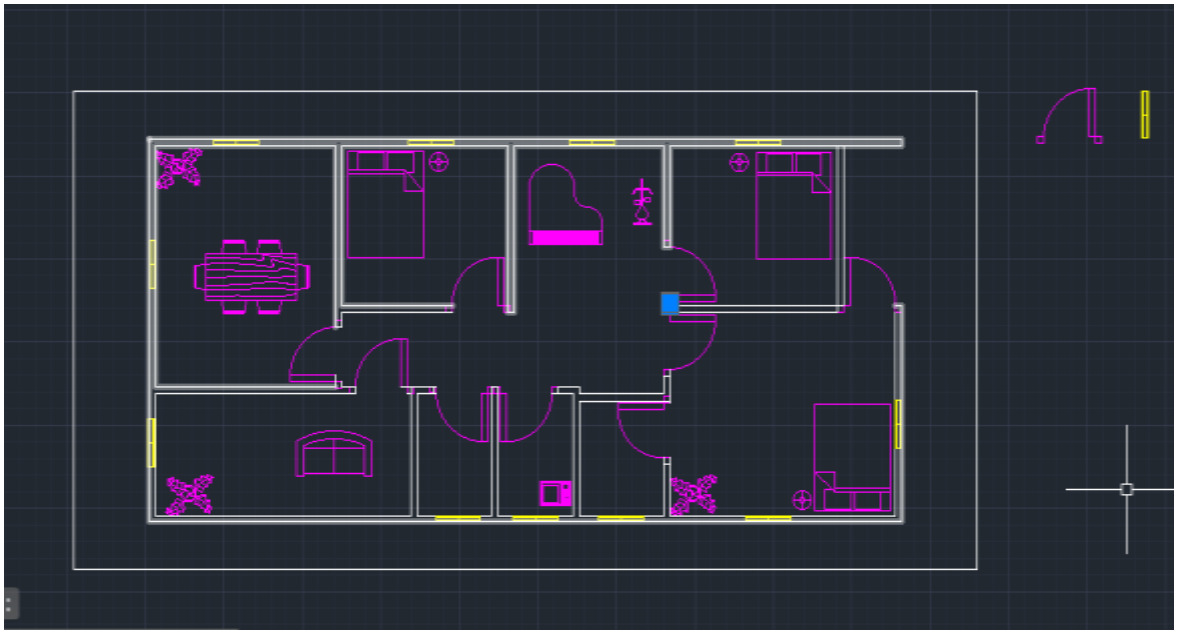

Figure: 06

6. FINAL OUTPUT

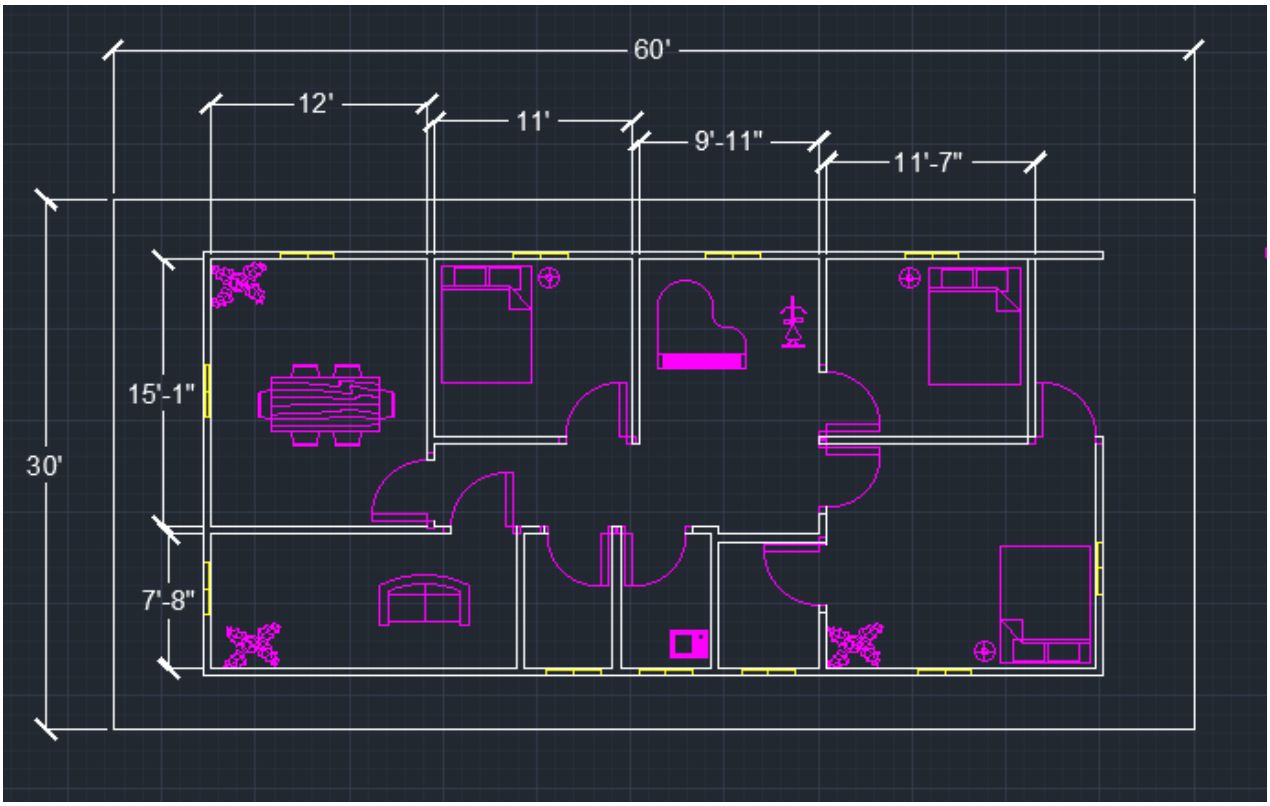

Figure: 08

7. ANALYSIS AND DISCUSSION

1. This experiment helps us to learn about basic Auto Cad operations such as create lines, circle, rectangle, blocks, layers, etc.
2. By this experiment we obtain the knowledge about 2D Floor design drawing technique and we can implement these tools to implement real life object.
3. We have to be careful about while taking the measurement for the hatches. Otherwise it will leads to a wrong diagram.
